T-SERIES**

THE DIFFERENCE IS INSIDE-OUT

T-SERIES

Four Points of Focus

DURABILITY

Terminal trucks are used around the clock, so we place a high priority on durability and up-time. T-Series trucks are designed from the ground up to get the job done-over and over again. We proudly feature a high strength steel frame and military grade Axletech axles.

INNOVATION

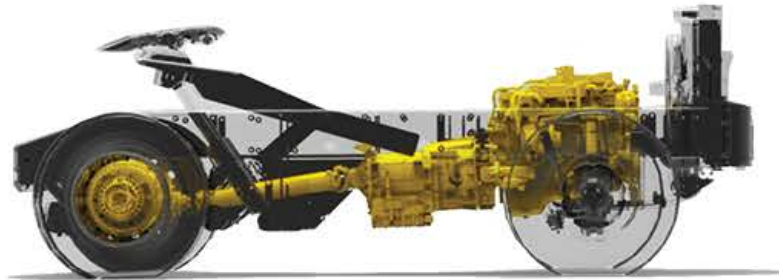

Re-inventing the terminal truck means blending innovative designs with proven standards. We are introducing our Patent-Pending Vertical Lift Path for less vehicle stress and smoother hook-ups, along with our Patent-Pending Quick-Attach System, which multiplies the usefulness of the T-Series.

EFFICIENCY

Our trucks are designed with the operator in mind. Our standard ergonomic features allow the operator to focus on the task at hand while feeling comfortable in the cab for long periods of time. From proper document storage to an intelligent cab layout, our focus is on driver comfort and maximum efficiency.

PERFORMANCE

T-Series trucks are powerful and reliable. We feature an industry proven drivetrain with Cummins engines and Allison transmissions. ALLT-Series trucks come standard with a Hendrickson air ride front and rear suspension. Our Patent-Pending Vertical Lift also reduces stress on the drivetrain and ensures consistent performance.

KEY PERFORMANCE FEATURES:

- Patent-Pending Vertical Lift Path
- Patent-Pending Quick-Attach System
- Allison 3500 Transmission
- Cummins Tier 4 6.7L Engine
- Military Grade Axletech Rear Axle
- Hendrickson Suspension

MAXIMUM EFFICIENCY & EXPERIENCE

We're on a mission to elevate the experience of owning and operating terminal trucks. When we set out to re-invent the terminal truck, we focused on maximizing both efficiency and the operator experience. In order to achieve both of those goals, our award-winning heavy duty vehicle design team went to work. We have added serious value without raising costs.
